7.3.2 SystemSignal

A SystemSignal represents a signal in the system view.

Attributes:
- shortName: Identifier (mandatory)
- length: Length of the signal in bits (mandatory)
- systemSignalGroup: Optional reference to a group

Constraints:
[constr_1234] The length of a SystemSignal shall be greater than 0.
[constr_1235] If a SystemSignal is part of a SystemSignalGroup, its length must be consistent with the group definition.

Related:
SystemSignal can be mapped to ISignal in the communication view.
See also: ISignal, SystemSignalGroup.
